Product Description

Goat anti-Calretinin

CG1

Straight antiserum

Product: Goat anti-Calretinin.

Code No: CG1

Form: Lyophilized antiserum.

Quantities available: 200 µl.

Reconstitution: with 200 µl bidistilled water.

Description: This antibody was produced against human recombinant calretinin. It can be used in immunohistochemistry and in immunoblots.

Immunohistochemistry on Calretinin knock-out mice

Antibody CG1 does not stain the brain of calretinin knock out mice (Fig. 1b).

Fig 1a: Immunohistochemical staining with antiserum CG1 in the cerebral cortex of a control mouse. Notice the strong stained interneurons in layer II and III (arrows). X100

Fig 1b: Absence of specific immunohistochemical staining with CG1 in the cerebral cortex of a Calretinin knock-out mouse (6). X 100

Working dilutions

Immunohistochemistry: 1:1'000 - 1:10'000 with the avidin-biotin method.

Immunoblots: 1:1'000.

We recommend that the optimal dilutions be determined by titration experiments.

Storage

For long storage, keep at - 80°C (or at least - 20°C). For continuous use keep at 4°C (with 0.01% Na-azide). Avoid repeated freezing and thawing.
