Product Description

**Monoclonal anti
Parvalbumin**

PV 235PUR

Affinity purified

*For publication in journals requesting antibody
concentration*

Product: Affinity purified monoclonal anti-Parvalbumin

Code No: PV235PUR

Antibody Concentration: 0.755 mg/ml

Form: Purified antibody in PBS (lyophilized).

Quantities available: 100 µl

Reconstitution: with corresponding amount of bi-distilled water

Description:

The antibody 235pur was purified with Protein-G from in vitro produced monoclonal antibody 235 directed against calretinin (see product description 235 for further details concerning immunoblot and immunohistochemistry). The antibody concentration is of 0.38 mg/ml in 0.1M phosphate buffered saline, pH 7.3.

Working dilutions:

Immunohistochemistry: we suggest using a dilution of 1:10'000 (0.038 µg/ml) for immunostaining with the avidin-biotin method on cryostat or paraffin-sections of paraformaldehyde (4%) or formalin-fixed tissue.

We recommend that the optimal dilutions be determined by titration experiments.

Storage

For long storage, keep small aliquots of 1-2 µl at - 80°C (or at least - 20°C). For continuous use keep diluted solutions at 4°C (with 0.01% Na-azide). Avoid repeated freezing and thawing.
